**Engenia** Herbicide

Engenia Herbicide is a patented formulation developed specifically for use on your dicamba-tolerant soybeans.

- Provides postemergence broadleaf weed control
  - Effective on over 200 broadleaf weeds
  - Including glyphosate, triazine, ALS, and PPO-resistant broadleaf weeds
  - Up to two weeks residual
- Most advanced formulation
  - BAPMA salt reduces volatility potential
- Most flexible
  - Lowest use rate = 12.8 fl oz/A
  - 5 lbs ae/gal formulation
  - Less product to handle
  - Convenient for use with direct injection

**Zidua** Herbicide

- Longer lasting residual control—up to two weeks longer than other herbicides
- Superior Palmer amaranth and waterhemp control
- Low use rates—cover more acres with less product to handle
- PRE and POST use flexibility

---

**Effective Weed Control in Dicamba Tolerant Soybeans**

- Layer residuals both PRE and POST
- Use multiple effective sites of action
- Target weeds less than 4 inches tall

---

Engenia herbicide is the most flexible and advanced dicamba for dicamba-tolerant crops
Reducing risk of off-target movement and sensitive plant injury is a result of effective application stewardship. The advanced dicamba formulation of Engenia® herbicide, along with proper application, can provide maximum broadleaf weed control and effectively minimize off-target potential.

Zidua® Herbicide Label Summary

- **Application Timing**: Preplant, Preemerge, and POST (emergence through third trifoliate)
- **Preplant/Preemerge Use Rates**: 1.5-3.5 oz/A (dry), 2.5-5.75 fl oz/A (SC)
- **Early POST Use Rate**: 1-3.5 oz/A (dry), 1.75-5.75 fl oz/A (SC)
  - Use rate of 1-2 oz/A (dry), 1.75-3.25 fl oz/A (SC) when a residual PRE herbicide is used. Use higher rates with wider row spacing and high weed pressure.
- Do not apply more than 2.1 oz/A (dry), 3.5 fl oz/A (SC) on coarse soils and 3.5 oz/A (dry), 5.75 fl oz/A (SC) on medium and fine soils per season

*Use rate is dependent on soil texture, application timing, and formulation (WG = dry, SC = liquid). Please consult label for appropriate application rate in your field.

Training and Education

Applicator training requirements vary depending on the state. Visit [www.engeniastewardship.com](http://www.engeniastewardship.com) for BASF resources on proper application according to label requirements. Proper nozzle selection, calibration, boom height, weather conditions, and the use of approved tank-mixtures are all addressed.
